Postpaid No Annual Contract Compensation for June 2009

T-Mobile launched Postpaid No Annual Contracts to provide customers the freedom to stay connected to those who matter most without the constraints of contracts!

Postpaid No Annual Contracts, launched October 8th 2008, are designed to address those customers who want to activate service but don't want to be tied down by contracts. **Please remember this plan is for PRIME CREDIT CLASS CUSTOMERS!**

Spread the word...compensation details below! WATSON System enhancements effective December 7th 2008.

IMPORTANT ACTIVATION CLARIFICATION: When activating Postpaid No Annual Contract rate plans for customers, it is important that Dealers select "PMC" (Postpaid Monthly Contract) rate plans on the Rate Plan screen in Watson.

The "1 Month" option also needs to be selected to ensure customers receive the correct contract length.

Note: If customers are not activated correctly with both the MONTHLY Postpaid (No Annual Contract) Rate plans and the term of 1 month contract from the "drop down", commission payouts will be affected.

Rate Plan determines commission: IMPORTANT: in WATSON/iCAM MONTHLY means NO CONTRACT

Example: If customers are activated on a Postpaid No Annual Contract Rate plan but are given a 12 or 24 month agreement, the dealer will only be paid out as per a PNAC/Monthly plan activation.

For dealers to be commissioned correctly for a 12 or 24 month agreement, a standard postpaid plan must be selected.
